4P BRASS PRESS FASTENER

Durable brass-plastic fastening system for long-life quality of your workwear.

Ensure superior durability of your workwear designs with robust fastening solutions for constant closing comfort.

BRASS-PLASTIC COMBINATION FOR SUPERIOR DURABILITY

Our 4P Brass Press Fastener is based on our S-Spring System 4 but uses a plastic spring (POM) instead of the conventional metal spring. POM is a high-tech thermoplastic with excellent dimension stability and outstanding wear resistance while also offering elastic properties. Integrated in the socket of the 4P Brass Press Fastener, the POM inlay is surrounded by a brass shell. This metal-plastic combination enables high stability and load-bearing capacity for a long-lasting closing comfort.

HIGH PERFORMANCE FOR VERSATILE APPLICATIONS

The Oeko-tex certified brass-plastic system not only impresses with lasting robustness and a high level of comfort but can also meet special waterproof requirements in combination with our Aqua system. Thus, the 4P Brass Press Fastener system is suitable for a wide range of applications in the workwear sector.

PPE

TECHNICAL PRODUCT DATA

| | |
|----------------------|--|
| Material | Brass and plastic (POM/Polyoxymethylene) |
| Size | ø 15 mm |
| Washability | 60°C |
| Certifications | OEKO-TEX Standard 100 |
| Opening force | 15–17N |
| System compatibility | S-spring, Aqua |

BENEFITS AT A GLANCE:

- ✓ Oeko-tex certified brass socket with plastic spring (POM)
- ✓ High robustness & longevity
- ✓ Constant performance & opening values
- ✓ Combinable with Aqua system for waterproof variations
- ✓ Suitable for various safety garments
