## TITANIUM FINISH

# Sustainable finish well-suited for your darker workwear designs.

Expand your design variety with a finish that adds a special extra of style and sustainability to your workwear without sacrificing its durability.

### MATTE ALTERNATIVE TO SHINY SILVER

Our Titanium Finish is a sustainable and resistant finish based on stainless steel, particularly offering you a fashionable alternative to shiny silver finish. With its darker and matte look, it is a perfect match for darker workwear designs, adding a special stylish touch. The finish is applicable for our stainless steel systems such as S-Spring and Gripfix, giving an excellent resistance.

### SUSTAINABILITY & RESISTANCE IN ONE

The Titanium Finish is Oeko-tex certified and has a lower environmental impact than other stainless-steel finishes. Its production doesn't require a galvanic process and therefore supports saving water, electricity, chemicals, and harmful waste. The Titanium Finish does not only open up a new design variety for workwear and safety garments, it also enables you to add an extra touch of sustainability to your creations.

### APPLICATION AREAS

Corporate Wear

Industry

Workwear

### TECHNICAL PRODUCT DATA

Material	Stainless steel finish
Washability	Industrial laundry, 60°C
Certifications	OEKO-TEX Standard 100
Opening force	Depending on the system used, e.g. S-Spring stainless steel system = 8N +2N Gripfix stainless steel system = 20N +2N
System compatibility	S-Spring, Gripfix, Ring-Spring, 4P

### BENEFITS AT A GLANCE:

- ✓ Oeko-tex certified stainless steel finish
- ✓ Suitable for industrial laundry
- ✓ Matte alternative to shiny silver finish
- ✓ Very resistant with high opening forces depending on the system used
- ✓ Applicable on our S-Spring, Gripfix and 4P stainless steel buttons
- ✓ Lower environmental impact compared to conventional stainless-steel finishes
